

The VHT logo is centered in the upper half of the image. It consists of the letters 'VHT' in a bold, gold, blocky font, with a registered trademark symbol (®) to the right. The letters are set within a dark, rounded rectangular frame that has a metallic, brushed-gold appearance. This frame is surrounded by dynamic, swirling flames in shades of orange, red, and yellow, which appear to be rising from behind the logo. The background is a solid black, making the flames and the gold logo stand out prominently.

VHT®

HIGH PERFORMANCE COATINGS

HIGH HEAT JUST GOT HOTTER!

It's always been about the heat at VHT. Now we've rolled out new packaging and improved your project results with the new Danvern® EZ Touch nozzle. So now you'll get even hotter results ... but we didn't change what you've come to expect from VHT ... "Extreme High Heat Performance". Through the years, the VHT brand has been the motorsport enthusiasts' choice for high-heat applications. It could withstand such extreme high-heat temperatures that it found its way into the space program and was used on space bound and atmospheric re-entry spacecraft. It doesn't get much hotter than that. Our FlameProof™ line can withstand temperatures of up to 2000°F ... perfect for your exhaust systems, turbo housings, piston domes and exhaust valves.

VHT also offers other High Heat products for applications ranging from 250°F (121°C) - 900° F (482°C): High Temp Engine Enamel™, Caliper Paint, Wheel Paint, Wrinkle Plus™ and Roll Bar & Chassis.

VHT's complete line-up includes products for your automotive exterior and interior dress-up applications. Check it out in the pages of this catalog ... Or hit vhtpaint.com to learn more!

VHT FLAMEPROOF™ COATING

VHT FlameProof™ Coating will renew and extend the life of any surface exposed to extremely high temperatures. This unique coating is a matte finish, silicone ceramic base widely used by the automotive industry on exhaust systems and the aerospace industry for jet engines, re-entry vehicles and other high temperature applications. VHT FlameProof™ Coating will withstand temperatures up to 2000°F (1093°C) and is ideal for use on headers, exhaust systems, or wherever an extreme temperature coating is needed.

11 oz can — Case pack: 6

Temperature: 1300°F-2000°F (704°C-1093°C)

Applications: Headers, Exhaust Manifolds, Piston Domes, Inside Heads

Finish: Flat

Dry Time: Curing time required and can be done on or off vehicle (see below)

Curing FlameProof™

VHT FlameProof™ Coating only attains its unique properties after correct curing (refer to instructions on the can).

On the Vehicle

- Paint must be completely dry before curing
- Run at idle for 10 minutes
- Cool for 20 minutes
- Run at idle for 20 minutes
- Cool for 20 minutes
- Run under normal operating conditions for 30 minutes

Off the Vehicle

- Paint must be completely dry before curing
- Heat to 250°F (121°C) for 30 minutes
- Cool for 30 minutes
- Heat to 400°F (204°C) for 30 minutes
- Cool for 30 minutes
- Heat to 650°F (343°C) for 30 minutes

CAUTION: Do not exceed the temperature of the least heat tolerant component or the base metal

Coating System VHT provides a multi-high performance coating system for the ultimate in protection and quality. The system includes surface preparation, primer, paint and clear coat.

VHT ENGINE METALLIC™

Under hood engine dress-up never looked this good, or stood up to high-heat temperatures like VHT Engine Metallic™ Paint. Formulated for high temperature and high performance applications, VHT Engine Metallic Paint™ creates a cool sparkling metallic finish and withstands intermittent temperatures of up to 650°F (343°C). A unique formulation of urethane and ceramic resins produces a tough and long lasting finish for engines, engine accessories, or any other surface that requires a durable, heat and chemical resistant finish.

11 oz can — Case pack: 6

Temperature: 650°F (343°C)

Applications: Headers, Engine Blocks, Starters, Brackets, Water Pumps, Valve Cover, Transmissions, Differential Covers

Finish: Flat Metallic

Dry Time: Dries to the touch in 30 mins.
Dries thoroughly overnight.

Curing Engine Metallic™

VHT Engine Metallic™ only attains its unique properties after correct curing.

- Bake at 200°F (93°C) for 20 min
- The inherent heat of engine operation will also accomplish curing.

Coating System VHT provides a multi-high performance coating system for the ultimate in protection and quality. The system includes surface preparation, primer, paint and clear coat.

VHT ENGINE ENAMEL™

VHT 550°F (288°C) Engine Enamels™ are available in a wide range of colors, including exact match factory colors. All colors have excellent durability and superior heat and chemical resistance. They are specially formulated to withstand corrosion, rust, salt spray, chemicals and additives of today's gasoline blends and degreasers. VHT 550°F (288°C) Engine Enamels™ are a unique blend of urethane and ceramic resins, which produce a tough and long-lasting finish for engines, engine accessories or wherever a tough durable heat or chemical resistant finish is needed.

11 oz can — Case pack: 6

Temperature: 550°F (288°C)

Applications: Headers, Engine Blocks, Starters, Brackets, Water Pumps, Valve Cover, Transmissions, Differential Covers

Finish: Flat, Satin, Gloss and Metallic

Dry Time: Dries to the touch in 30 mins.
Dries thoroughly overnight.

VHT ANODIZED COLOR COAT

Now DIYers can create an anodized look under their hoods. This unique transparent coating creates an anodized effect over properly prepared chrome, shiny bare metal and faux chrome-like surfaces for a spectacular metallic finish. VHT Anodized Color Coat is formulated for high temperature and high performance engine paint applications. It withstands intermittent temperatures up to 550°F (228°C).

VHT ANODIZED BASE COAT

To create the anodized metal look over non-metal and/or painted surfaces, first prime with VHT Anodized Base Coat. Then apply VHT Anodized Color Coat when dry.

11 oz can — Case pack: 6

Temperature: 550°F (228°C)

Applications: Engine Components, Chrome Wheels, Bumpers, Trim, Accessories

Finish: Translucent Gloss Color

Dry Time: Dries to the touch in 30 mins.
Dries thoroughly overnight.
No curing required.

VHT BLACK OXIDE CASE PAINT

VHT Black Oxide Case Paint is a satin finish high temperature coating developed specifically for 2 and 4-stroke motorcycle engines. It is petrol and solvent resistant, and virtually stops rust and corrosion, even in severe weather conditions.

11 oz can — Case pack: 6

Temperature: 550°F (288°C)

Applications: Small Motorsports Engines

Finish: Satin

Dry Time: Dries to the touch in 30 mins.
Dries thoroughly overnight.

CURING BLACK OXIDE CASE PAINT

VHT Black Oxide Case Paint only attains its unique properties after correct curing.

- The inherent heat of engine operation will accomplish curing.
